## Spotting 2-Engine Wide-Body Jet Airlines

The airliner is large, and has two engines ... what is it ?

Most wide-body jet airliners in service today have two engines, one under each wing, and are manufactured by Boeing or Airbus.

Several aircraft reside in the "twin-engine, wide-body" category, including:

- Boeing 767, 777 and 787
- Airbus A300, A310, A330 and A350

### The Boeing Twin-Engine Wide-Body Family of Airlines

Comparison of the twin-engine, wide-body Boeing 767-200, 767-300 and 767-400 models. The main landing gear fall towards the front on the 767.
